TDD / BDD
CI / CD

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Full-stack / Front-end

Nov 2018 - Dec 2023

Smartsheet

Bellevue, WA

Lead front-end engineering for a couple small teams, responsible for requirement gathering, design, and implementation of a number of microservices and their respective UIs.

- Architected and led the development of a modular administrative platform; oversaw a small team of remote engineers and then transitioned slowly to in-house resources, serving as a technical project and team lead for all UI efforts. Responsible for the successful quality and delivery of the product and worked closely with product and UX to ensure customer needs were met.
- As the company generally grew, led the adoption of cross-company UI initiatives for the teams I supported, including micro-frontend pattern adoption and project consistency.
- Designed and developed a handful of domain-oriented microservices and helped to generally improve coding and testing practices on all layers.
- Took ownership of a few feature areas with no remaining subject-matter experts in order to lead maintenance and solve critical performance issues.

Skills: HTML, CSS, JavaScript, TypeScript, Java, React, Redux, RxJs, Node.js, Storybook, AWS, Spring, Nginx, Kubernetes, Docker, Micro-frontend

Software Design Engineer II

Full-stack

Mar 2016 - Nov 2018

SAP Concur

Bellevue, WA

Responsibilities included working with stakeholders and engineering leadership to design and develop a variety of communication-oriented solutions.

- Designed and developed a third party component which served content-rich in-product customer success messages, replacing an image-only solution.
- Worked with stakeholders to design a recommendation system and supporting UIs to replace their reliance on Google AdSense. The service was tuned to handle hundreds of requests per second, and enabled marketers to deliver higher quality campaigns to the right customer.
- Led team's adoption of company-wide micro front-end patterns, accessibility guidelines, and UI performance tuning.

Skills: HTML, CSS, JavaScript, TypeScript, React, Redux, RxJs, Node.js, Storybook, Python, AWS, ASP.NET, C#, Cassandra, MongoDB, Nginx, Kubernetes, Docker

PROFESSIONAL EXPERIENCE (CONT.)

Front-end Engineer

Oct 2015 - Feb 2016

Front-end exclusive role focused on maintenance of an Angular/D3.js analytics dashboard.

Applause

Bellevue, WA

- Developed a dynamic tooltip widget that could be used in any chart or visual context.
- Enhanced chart UIs with a light/dark theming capability to match the latest UX design system.

Skills: HTML, CSS, SASS, Angular, D3.js

Software Engineer

Front-end

Jul 2013 - Oct 2015

Responsible for the development of customer products, serving as the team's front-end subject-matter expert, and delivering pixel-perfect UIs.

Slalom Consulting

Seattle, WA

- Built and drove many feature areas of a large scale Angular application, Maestro by Madison Performance Group. Supported the team through front-end guidance and leadership.
- Contributed to Spectrum UI, a novel web-to-MPEG streaming platform framework written in JavaScript and assisted in raising the bar for test coverage.
- Built a faceted search solution, including Google Maps integrations and a discovery portal for American Homes 4 Rent, and additionally contributed to product ideation to assist the customer's design vision.

Skills: HTML, CSS, SASS, LESS, JavaScript, CoffeeScript, jQuery, Angular, C#, .NET, Bootstrap

Web Developer & Teacher's Assistant

Part-time

Jun 2012 - Mar 2013

Held a couple of roles through the University of Washington

- Worked for UWTV, developing a small LAMP stack web application for broadcast operators to communicate across shifts.
- Worked for the Dept of Student Aid, helping to digitize a number of form-based paper workflows.
- Designed and ran lab sessions for an introductory Databases class as a Teacher's Assistant

Skills: HTML, CSS, JavaScript, jQuery, SQL, PHP, (LAMP)

University of Washington

Seattle, WA
