

Matt Whitaker

LEAD FRONT-END ENGINEER

Bellevue, WA

Experienced front-end-leaning software engineer with 12 years of experience building robust, user-friendly web applications. Experienced in owning all aspects of development and product health, as well as team leadership.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Full-stack / Front-end

Smartsheet

Bellevue, WA

Nov 2018 - Dec 2023

Led front-end development for a couple of small teams, while also contributing extensively across the stack. Responsible for taking projects from conception to delivery.

- Architected and led the development of a modular administrative platform; oversaw a small team of remote engineers and then transitioned gradually to in-house resources, serving as a technical project and team lead for the front-end. Responsible for the successful quality and delivery of the product and worked closely with product and UX to ensure customer needs were met.
- As the company generally grew, led the adoption of cross-company UI initiatives for the teams I supported, including micro-frontend pattern adoption and project consistency.
- Designed and developed a handful of domain-oriented microservices and helped to generally improve coding and testing practices on all layers.
- Took ownership of critical feature areas with lacking subject-matter experts in order to lead maintenance and solve critical performance issues.

Skills: HTML, CSS, JavaScript, TypeScript, Java, React, Redux, RxJs, Node.js, Express, Storybook, AWS, Spring, Nginx, Kubernetes, Docker

Software Design Engineer II

Full-stack

SAP Concur

Bellevue, WA

Mar 2016 - Nov 2018

Responsibilities included working with stakeholders and engineering leadership to design and develop a variety of communication-oriented solutions.

- Designed and developed a third-party component that served content-rich in-product customer success messages, replacing an image-only solution.
- Worked with stakeholders to design a recommendation system and supporting UIs to replace their reliance on Google AdSense. The service was tuned to handle hundreds of requests per second, and enabled marketers to deliver high-quality campaigns to the right customer.
- Led team's adoption of company-wide micro front-end patterns, accessibility guidelines, and UI performance tuning.

Skills: HTML, CSS, JavaScript, TypeScript, React, Redux, RxJs, Node.js, Express, Storybook, Python, AWS, ASP.NET, C#, Cassandra, MongoDB, Nginx, Kubernetes, Docker

Front-end Engineer

Applause

Bellevue, WA

Oct 2015 - Feb 2016

Front-end exclusive role focused on maintenance of an Angular/D3.js analytics dashboard.

- Developed a dynamic tooltip widget that could be used in any chart or visual context.
- Enhanced charts with light/dark theming capabilities to match the latest UX design system.

Skills: HTML, CSS, SASS, Angular, D3.js

Software Engineer

Slalom Consulting

Seattle, WA

Jul 2013 - Oct 2015

Responsible for the development of customer products, driving front-end efforts and delivering pixel-perfect UIs.

- Contributed to several feature areas of a large scale Angular application, Maestro by Madison Performance Group. Focused in front-end development and mentoring peers in Angular.
- Contributed to Spectrum UI, a novel web-to-MPEG streaming platform framework written in JavaScript and assisting in raising the bar for test coverage.
- Built a faceted search solution, including Google Maps integrations and a discovery portal for American Homes 4 Rent, and additionally contributed to product ideation to assist the customer's design vision.

Skills: HTML, CSS, SASS, LESS, JavaScript, CoffeeScript, jQuery, Angular, C#, .NET, Bootstrap

Web Developer & Teacher's Assistant

Part-time

University of Washington

Seattle, WA

Jun 2012 - Mar 2013

Held a couple of roles at the University of Washington

- Worked for UWTV, developing a small LAMP stack web application for broadcast operators to communicate across shifts.
- Worked for the Dept of Student Aid, helping to digitize a number of form-based paper workflows.
- Designed and ran lab sessions for an introductory Databases class as a Teacher's Assistant

Skills: HTML, CSS, JavaScript, jQuery, SQL, PHP, Apache

Ruby on Rails Developer

Internship

Vous Vitamin

Seattle, WA

Jan 2011 - Dec 2011

Internship with the startup Vous Vitamin (then Vous Health), where I was a web developer helping to build a Ruby on Rails website.

- Built UIs to spec delivered by UX
- Developed data APIs to drive the UI

Skills: HTML, CSS, jQuery, Ruby, Ruby on Rails, Apache

EDUCATION

Bachelor of Science

Informatics: IA

University of Washington

Seattle, WA

SKILLS

HTML / CSS, JavaScript, TypeScript, Node.js, Express, Java, React, Redux, RxJs, Jest, Cypress, Storybook, AWS, Nginx, Docker, Kubernetes

METHODOLOGY

Agile / Scrum, TDD / BDD, CI / CD
