

Matt Whitaker

Lead Front-end Engineer

Bellevue, WA

Summary

Experienced front-end-leaning software engineer with over a decade of experience building robust, user-friendly web applications. Experienced in product ownership and team leadership, leading small teams to deliver large, complex products.

Professional Experience**Senior Software Engineer (Full-stack / Front-end)**

Smartsheet, Bellevue, WA

November 2018 - December 2023

Led front-end development for a couple of small teams, while also contributing extensively across the stack. Responsible for taking projects from conception to delivery.

- Architected and led the development of a modular administrative platform; oversaw a small team of remote engineers and then transitioned gradually to in-house resources, serving as a technical project and team lead for the front-end. Responsible for the successful quality and delivery of the product and worked closely with product and UX to ensure customer needs were met.
- As the company generally grew, led the adoption of cross-company UI initiatives for the teams I supported, including micro-frontend pattern adoption and project consistency.
- Designed and developed a handful of domain-oriented microservices and helped to generally improve coding and testing practices on all layers.
- Took ownership of critical feature areas with lacking subject-matter experts in order to lead maintenance and solve critical performance issues.
- **Skills:** HTML, CSS, JavaScript, TypeScript, Java, React, Redux, RxJs, Node.js, Storybook, AWS, Spring, Nginx, Kubernetes, Docker

Software Design Engineer II (Full-stack)

SAP Concur, Bellevue, WA

March 2016 - November 2018

Responsibilities included working with stakeholders and engineering leadership to design and develop a variety of communication-oriented solutions.

- Collaborated with stakeholders and engineering leadership to design and develop communication-oriented solutions.
- Designed and developed a third-party component that served content-rich in-product customer success messages, replacing an image-only solution.
- Worked with stakeholders to design a recommendation system and supporting UIs to replace their reliance on Google AdSense. The service was tuned to handle hundreds of

requests per second, and enabled marketers to deliver high-quality campaigns to the right customer.

- Led team's adoption of company-wide micro front-end patterns, accessibility guidelines, and UI performance tuning.
- **Skills:** HTML, CSS, JavaScript, TypeScript, React, Redux, RxJs, Node.js, Storybook, Python, AWS, ASP.NET, C#, Cassandra, MongoDB, Nginx, Kubernetes, Docker

Front-end Engineer

Applause, Bellevue, WA

October 2015 - February 2016

Front-end exclusive role focused on maintenance of an Angular/D3.js analytics dashboard.

- Developed a dynamic tooltip widget that could be used in any chart or visual context.
- Enhanced charts with light/dark theming capabilities to match the latest UX design system.
- **Skills:** HTML, CSS, SASS, Angular, D3.js

Software Engineer

Slalom Consulting, Seattle, WA

July 2013 - October 2015

Responsible for the development of customer products, driving front-end efforts and delivering pixel-perfect UIs.

- Contributed to several feature areas of a large scale Angular application, Maestro by Madison Performance Group. Focused in front-end development and mentoring peers in Angular.
- Contributed to Spectrum UI, a novel web-to-MPEG streaming platform framework written in JavaScript and assisting in raising the bar for test coverage.
- Built a faceted search solution, including Google Maps integrations and a discovery portal for American Homes 4 Rent, and additionally contributed to product ideation to assist the customer's design vision.
- **Skills:** HTML, CSS, SASS, LESS, JavaScript, CoffeeScript, jQuery, Angular, C#, .NET, Bootstrap

Web Developer & Teacher's Assistant (Part-time)

University of Washington, Seattle, WA

June 2012 - March 2013

Held a couple of roles at the University of Washington

- Worked for UWTV, developing a small LAMP stack web application for broadcast operators to communicate across shifts.
- Worked for the Dept of Student Aid, helping to digitize a number of form-based paper workflows.

- Designed and ran lab sessions for an introductory Databases class as a Teacher's Assistant
- **Skills:** HTML, CSS, JavaScript, jQuery, SQL, PHP, (LAMP)

Education

Bachelor of Science, Informatics

University of Washington, Seattle, WA

Skills

HTML / CSS, JavaScript, TypeScript, Node.js, Java, React, Redux, RxJs, Jest, Cypress, Storybook, AWS, Nginx, Docker, Kubernetes

Methodologies

Agile / Scrum, TDD / BDD, CI / CD
